My skill set includes proficiency in Python and SQL for data, as well as advanced data engineering tools such as Apache Spark, Databricks, and dbt. I have experience building and managing data pipelines, working with structured and unstructured data, and using cloud platforms such as Google Cloud. I also have strong skills in data visualization using Looker and Power BI.

In addition to data engineering, I have knowledge of software engineering and full-stack development, using technologies such as TypeScript, Node.js, React, and Next.js, which allows me to develop data solutions with a greater focus on architecture, code quality, APIs, automation, and software engineering best practices.

Education

Computer Engineering

UNICSUL

Aug 24 – Jul 29 (In progress)

Experience *Boticário Group*

Senior Product Analytics

Curitiba, PR, Brazil - Nov 2025 - Present

- I serve as a strategic data partner for multiple product and business teams, identifying opportunities and defining analytical solutions to support data-driven decisions.
- I develop and refine dashboards, analytical models, and datasets, supporting teams with varying levels of data maturity.
- I structure tables and analytical assets to ensure the consistency, reusability, and reliability of the information used by the products.
- I created and am responsible for a Data Hub that centralizes technical documentation, a dashboard catalog, metrics, and data quality information, enhancing governance and the discovery of analytical assets.
- I collaborate with Engineering, Product, and Business teams to define metrics, KPIs, and best practices to foster a data-driven culture.

Tech Lead (Interim) — Data & BI Team

Curitiba, PR, Brazil - Nov 2024 - Nov 2025

- Leadership of the Data & BI team, implementing scalable, high-performance solutions.
- Defining data architecture to integrate different sources and optimize analysis processes.

- Developing dashboards and strategic reports to support executive and operational decision-making.
 - Collaborating with IT and Engineering teams to ensure alignment between technical and business requirements.
-

PagoNxt Merchant Solutions

Analytics Engineer

Porto Alegre, RS, Brazil - Apr 2024 - Nov 2024

- Coordinated the activities of an Analytics Engineer while simultaneously managing the responsibilities of a Data Analyst for a period of time.
- Created a data quality MVP for one of the company's flagship products.

Senior Data Analyst

Porto Alegre, RS, Brazil - Oct 2023 - Jun 2024

- Developed dashboards and automated processes for new products, collaborating with business units.
 - Used SQL, Python, Scala, Databricks, and Power BI.
 - Led the creation of a dashboard to optimize marketing campaigns for a product with over \$60M in revenue, taking responsibility for developing queries, automating jobs, developing and maintaining datasets, and providing comprehensive project documentation.
-

Alura

Data Analyst

São Paulo, SP, Brazil - Oct 2021 - Oct 2023

- Primary data specialist on the sales team, focused on educating the team and conducting engagement studies for major clients.
 - Used Power BI, SQL, and Python for automation, and Excel to provide data to non-technical stakeholders.
 - Led the redesign of governance processes and the presentation of results for the largest client, resulting in a multi-year contract. Conducted an ROI study that prevented churn and generated a 20% upsell.
 - Educated the non-technical team through data-driven presentations.
-

Torceai

Partner & Data Lead

Maringá, PR, Brazil - Jan 2021 - Jan 2023

- Enhanced the database by migrating from a star schema to Snowflake, using MySQL Workbench and Apache Airflow.
- Designed and implemented management information dashboards to monitor key metrics such as total customers, revenue, and internal processes.

Partner and Full-Stack Developer

Torceai

Maringá, PR, Brazil - Aug 2019 - Jan 2021

- Contributed to the development and maintenance of the company's product using **Node.js** and **Angular**.
-

Anymarket

Junior Data Analyst

Maringá, PR, Brazil - July 2020 - June 2021

- Analyzed data and delivered reports to managers and teams, primarily using Excel and basic SQL.
 - Led the implementation of the Customer Success software, defining metrics and churn scores.
-

aiqfome

Customer Success / Key Account

Maringá, PR, Brazil - Feb 2019 - Jun 2020

- Managed brand licensees, setting and tracking monthly goals.
- Analyzed results and identified issues to plan and implement effective solutions in the sales, marketing, finance, and legal areas.
- Was responsible, together with Farming leadership, for the internal account clustering structure.
